	Prohibitive	Functional	Exceptional
Function of Tool	The overall function of the AI tool, or its benefit to educators or students, is unclear or undeveloped, which distracts from its overall practicality and potential.	The AI tool works as advertised; it effectively performs a task which enhances the student or teacher experience and improves the efficiency of classroom leadership or management.	The AI tool not only performs its advertised function effectively and efficiently, but also provides unrivaled benefits to students and teachers.
Scope of Use	The AI tool is inadequately specific to benefit a sufficient percentage of subjects or grade levels to justify its use in schools.	The AI tool's scope and potential for educators to improve workflow or classroom leadership is adequate to justify its use in schools.	The AI tool is universally beneficial to educators and students, improving workflow and classroom leadership in all subject areas and grade levels.
Ease of Use	The usability of the AI tool is not intuitive, and the tool's lack of support services or PD offerings prevent its use by all of its target audience.	The AI tool is user-friendly, and is able to be used by all educators either through intuitive exploration or company-provided PD or support services.	The AI tool is straightforward and effective; all teachers are able to use this tool without further guidance than the tool's targeted PD, and any additional support is given in a clear and timely manner by the provider.
Cost	The AI tool exceeds the scope of the school's available AI budget or is unreasonable given its functions and originality.	The AI tool's price is reasonable given its scope and potential to improve teacher workflow and benefit student learning.	The AI tool's price falls within a school's budget allocated toward technological infrastructure improvements (or the AI tool is free!).
Privacy Policy	No privacy policy is provided, or insufficient in order to determine that educator and student data is safe and privacy is assured.	Privacy policy is legitimate and provides adequate evidence that educator and student data is safe and privacy is assured.	Privacy Policy is legitimate, clear, and detailed, demonstrating the security of the AI tool and the company's commitment to ensuring data privacy.
Accessibility	The AI tool is not accessible to all. There are little or no intentional efforts made to ensure that all students and educators feel that the tool is made with their unique considerations in mind.	There are intentional efforts made by the AI tool's manufacturer to ensure that accessibility of the tool is a top priority. If there are specific concerns about the accessibility of the product, then those are dealt with in a timely and professional way by the company.	The AI tool is available to all. There are no barriers preventing universal accessibility of the product and measures are taken to ensure that every educator and student feel that the tool is built for them.
